## The Evolution of Soundproof Office Pods

In 2001, a visionary designer patented for the "phone booth furniture with a seat" (AT44343S), marking the first combination of functionality and comfort.

A significant breakthrough occurred in 2010 with the introduction of the "phone booth with a seat and soundproof door" (KR300601520S). This design revolutionized the field by integrating a soundproof door.

In 2014, the emergence of the "telephone booth" design (USD732691S1) further enriched the scope of workspace design, emphasizing the integration of aesthetics and functionality.

In 2018, Dancoo's "telephone booth" (EU0052530690003S) introduced the concept of combining minimalism with functionality, Since then, the role of office telephone booths has evolved from merely isolating internal and external noise to multifunctional soundproof workstations that meet new aesthetic requirements and adapt to new work styles. Today, hundreds of companies worldwide are engaged in this thriving industry.

## Safer and More Natural Smart Pods

In 2024, industry pioneer Framery introduced the Framery Smart Pods series, leading a new trend of black, industrial-style metal entryways for office pods.

During the development of its smart soundproof pods, became deeply aware of the security risks associated with the transfer and processing of personal information. Consequently, resolutely prioritized user privacy and security, opting not to transfer or process user data. despite the technical feasibility of doing so.

redeveloped multiple key technologies to enable centralized intelligent control of various functions within the smart pods via a CPU and high-resolution touchscreen, all without involving user data. These functions include ventilation, lighting, human presence detection, occupancy indicator , and adjustable desk.

Adhering to a design philosophy that embraces nature, smart pods create a comfortable interior environment for users. They incorporate a high color rendering index lighting system that simulates natural daylight and use natural birch plywood and wool materials to foster a natural and cozy work atmosphere. Compared to the monotonous, fixed industrial design and dull black entryways of office pods, holds the largest number of protected "minimalist" design patents in the office soundproof office pod industry has introduced diversified entryway designs. This makes smart pods more minimalistic, warm, and natural, providing users with more choices.

smart pods offer users a comfortable, natural, and diversified work environment while protecting their privacy, making them a unique solution in the market for smart soundproof pods.

## Smart Pods / Smart Feature

All Smart Pods can be equipped with excellent configurations, making comfortable ventilation and lighting easily at your fingertips.

**Occupancy Indicator** Installed outside the pod, it allows you to see from a distance whether the booth is vacant or reserved.

**Ceiling Light**  
Color temperature 4000 K, CRI > 90,  
3400lm, desktop illuminance over 500lux.

**Video Light**  
Color temperature 4000 K, CRI > 90,  
1000lm, face illuminance up to 400lux.  
Supports preset and manual adjustment of lighting modes via touchscreen.

**Intuitive UI**  
The high-resolution touchscreen simplifies the setup and adjustment of the ventilation and lighting systems within the soundproof pod, while also enabling you to schedule pod time from anywhere in the world.

**Privacy-First Smart Innovation**

Smart pods, featuring a high-resolution touchscreen, it simplifies the setup and adjustment of the ventilation and lighting systems within the soundproof pod, while also enabling you to schedule pod time from anywhere in the world. We respect the privacy of our customers' data regarding the use of soundproof pods and will not use it as a prerequisite for making the pods smart.

**Ultimate Dual Privacy Shield**

The original design intention of Dawn is to protect clients' business privacy and acoustic privacy in their workspaces. We recognize that data regarding clients' usage of soundproof pods constitutes their business privacy, and we do not transmit or process such highly sensitive information. In terms of acoustic privacy protection, Smart Dawn's A-Class soundproofing performance assures the pods can be placed next to workstations without causing noise distractions to the occupants in the pod or to the people outside. And echo-free interior acoustics make Dancoo Dawn a private, comfortable space for work and video calls.

**Airflow that keeps you fresh**

With our smart airflow system, you can feel refreshed and focused. Our improved ventilation keeps the air around you fresh every minute, like a clean and cozy space. You can easily adjust the ventilation with just one touch on the pod's touchscreen. Our advanced ventilation solutions make you feel comfortable and convenient.

**Even Closer to Nature**

By incorporating high CRI lighting that mimics natural daylight and using natural birch plywood materials, Smart Dawn creates a workspace that feels even closer to nature. Automated dual-lighting sources adapt to your needs, and preset lighting options are available for you to choose from, suitable for either work or video mode. Video-optimized lighting enhances your appearance during video calls. Adjustments can be made quickly and easily through the touchscreen display.

**A-CLASS SOUNDPROOF**

**30 dB**

Guaranteed Class A privacy with speech level reduction exceeding 30dB, as evidenced by SGS test reports and the ISO 23351-1 rating for office pods.

**AUTOMATED AIRFLOW**

**56 sec**

Air inside the pod is fully renewed every 56 seconds with maximum air flow.

**SENSITIVE INFORMATION HANDLING**

**0%**

We respect the privacy of our customers' data regarding the use of soundproof pods and will not use it as a prerequisite for making the pods smart.

**SMART DAWN COMPACT**

**The smart single-user office phone booth.**

- Smart Dawn Compact is an office phone booth designed for phone and video calls; it feels spacious inside while taking minimal amount of floor space
- This phone booth is built to last and designed with sustainability without compromising performance or quality
- Table always included optional height-adjustable stool or Cadrea high stool
- The high-resolution touchscreen and the dual adjustable high color rendering index LED light sources enable smooth transitions between video and work modes always included
- Smart diverse patented entry designs • Nature-inspired interior environment

**SMART DAWN**

**The smart one-person office pod.**

- Smart Dawn is an ideal soundproof office pod, serving as a smart and spacious one-person workstation optimized for video calls and focused work.
- Comfortable and versatile contemporary design
- Categorized into four groups based on furniture preferences: DDP, DDS, DDH, and DDL, Adjustable electric work desk always included for DDP and DDS ; Optional height-adjustable seat or Cadrea high stool for DDS and DDH, Sofa for DDL.
- The high-resolution touchscreen and the dual adjustable high color rendering index LED light sources enable smooth transitions between video and work modes always included.
- Smart diverse patented entry designs. • Nature-inspired interior environment.

**SMART 2D**

**The smart meeting pod for up to 4 people.**

- Smart 2D is a perfect extension of the Smart Dawn office pod. By cleverly combining two single pods, it creates a spacious and multifunctional soundproof meeting space engineered for face-to face meetings and hybrid work
- Spacious interior that comfortably fits two sofas with oversized 53cm x 110cm meeting or worktable
- A unique middle structure design that makes entry and exit more convenient while providing stable support for the oversized table.
- Table and two sofas always included
- The high-resolution touchscreen and the adjustable 180mmX850mm high color rendering index LED light sources always included.
- Nature-inspired interior environment.

**Privacy-First Smart Innovation**

P's smart pods, featuring a high-resolution touchscreen, greatly simplifies preset and real-time adjustments for ventilation and lighting within the pods. The dual-light source design offers high color rendering index while seamlessly switching between video and work modes to cater to individual needs. Adjustable dual fans with a damping bracket ventilation system enhancing the overall intelligent experience. We recognize that data regarding clients' usage of soundproof pods constitutes their business privacy, and as such, we refrain from transmitting or processing such highly sensitive information and will not use it as a prerequisite for making the pods smart.

**Triple Privacy Guaranteed**

We respect the business privacy of our customers' data regarding the use of soundproof pods and will not use it as a prerequisite for making the pods smart. Dancoo P exceed 30dB in DS,A according to the industry's highest ISO23351-1 testing standards and rating methods, achieving Class A soundproofing. smart P has been awarded the world's first" Excellent Quiet" "Premium Performance Gold Award" certificate issued by SGS for its outstanding acoustic performance. Additionally, Smart P is characterized by a design concept that emphasizes visual privacy, seamlessly integrating advanced technology into every detail.

**Airflow that keeps you fresh**

With our smart airflow system, you can feel refreshed and focused. Our improved ventilation keeps the air around you fresh every minute, like a clean and cozy space. You can easily adjust the ventilation with just one touch on the pod's touchscreen. Our advanced ventilation solutions make you feel comfortable and convenient.

**Even Closer to Nature**

## Smart Pods / Door options

Smart Pods are built sustainably and engineered to last, refusing the monotonous industrial black. This is reflected in the construction of its door system. Not only are the door locks and hinges made of industry-leading products but there are also multiple colors to choose from. Furthermore, the door frame and door handle made of HPL veneer offer even more color options.

### Frameless Full-Glass Door

The design of the frameless full-glass door is sleek and modern, with a sense of technology. It can minimize the visual sense of oppression for users in enclosed soundproof pods with limited space, making the entire space appear more transparent and natural. This is particularly important for soundproof pods that require unobstructed visual lines. At the same time, it is easy to clean and maintain.

The **frameless full-glass door lock** chosen has been certified by the EN12209 standard and has passed a 200,000-cycle test of handle movement. The lock body and handle are available in three colors: **natural anodized, black, and white powder coating**.

The height-adjustable seat offers pure natural wool fabric, providing a soft, smooth, and comfortable touch. It offers excellent sitting experience.

### Natural Birch Plywood Door

DoorDoors made with natural birch plywood materials not only create a workspace that feels even closer to nature for the soundproofing pod but also have a layered structure that effectively blocks sound transmission, thus providing excellent soundproofing performance.

The seat cushion is filled with a custom-shaped sponge, boasting excellent elasticity and cushioning performance. It can adapt to the user's body curves, providing personalized support and comfort, and reducing fatigue caused by prolonged use. Additionally, the seat and sofa surface can be customized with polyester double-structure fabrics in various colors according to the designer's requirements, offering versatile color options.

Sofa with more comfortable sitting experience can not only make long-term work more pleasant but also play a significant role in improving the acoustic environment inside the soundproof pod.
